### PROFESSIONAL SUMMARY

Versatile Freelance Full-Stack and iOS Developer specializing in architecting and deploying scalable SaaS platforms, high-performance native iOS applications, custom CRM systems, e-commerce applications, and robust REST APIs. Combines deep backend and mobile architecture knowledge with responsive, pixel-perfect frontend development to deliver seamless web and mobile solutions. Dedicated to discovery-driven problem solving, clean code architecture, reliable delivery, and long-term product maintainability.

### TECHNICAL EXPERTISE

- Frontend & Mobile Development: React.js, Next.js, Native iOS, Swift, TypeScript, JavaScript (ES6+), Tailwind CSS, Responsive Web Design
- Backend Architecture: Java, Spring Boot, RESTful APIs, Microservices, JWT/OAuth Authentication, Clean Architecture
- Database Management: PostgreSQL, MySQL, Supabase, Relational Schema Design, Query Optimization
- DevOps & Deployment: Vercel, Netlify, Railway, CI/CD Integration, Performance Optimization, Production Monitoring

### FEATURED PROJECTS

#### WayPoint – Secure iOS Mobile Application

- Tech Stack: Native iOS, Swift, Java/Spring Boot Backend, Secure Authentication SDKs, REST APIs
- Architected and developed a high-performance native iOS application focusing on secure user data handling, robust authentication flows (PIN/biometrics), and seamless mobile interaction.
- Integrated complex client-side encryption and backend APIs to ensure maximum security, low latency, and smooth UI/UX across mobile devices.
- Optimized state management and component rendering to provide a fluid, native mobile experience.

#### NexusPlatform – Social Networking, Marketplace & Escrow Trading Platform

- Tech Stack: Java, Spring Boot, React.js, Next.js, Supabase, PostgreSQL, Railway, Netlify
- Architected a modular multi-tier application offering user authentication, social feeds, community spaces, and real-time messaging.
- Engineered a custom staged escrow trading workflow and marketplace system backed by complex PostgreSQL transaction management.
- Optimized frontend components and API endpoints to maintain minimal response times and seamless UI interaction patterns.

### CORE SERVICES & WORKING APPROACH

- Services Provided: End-to-end SaaS/mobile apps, secure Java Spring Boot REST APIs, and business automation/AI workflow integration.
- Working Style: Discovery-first scope alignment, transparent progress milestones, and modular, future-proof code structure.
